- Tech Stack - React, Redux, Node.js, Bootstrap, Javascript.

SKILLS

React

Javascript

Node.js

MongoDB

Express

Bootstrap

UI/UX Design

HTML/CSS

React Native

Python

Redux

Angular

PERSONAL PROJECTS

Chat application using React and LoopbackJs

- This is a chat application that works on localhost, where a user can sign up/ log in and chat with another user. It uses web sockets to establish and maintain connections between users, and uses redux to manage application state.
- <https://github.com/zorgonide/Chatter>

Restaurant website using React

- Built a sample website for a restaurant using React framework as a single page application, utilising ReactStrap library for Bootstrap 4, and Redux for managing application state. Data was fetched and updated using REST API endpoints.
- <https://github.com/zorgonide/ReactJs-Restaurant-Website>

Restaurant application using React Native

- Rebuilt the earlier website using React Native framework as a cross-platform mobile application, utilising expo for building and hosting, and Redux for managing application state.
- <https://github.com/zorgonide/Confusion-React-Native>

CERTIFICATES
